

**INCONEL 693 Plate, Sheet, Pipe, Bar**

Alloy Inconel 693 excellent resistance to metal dust and high temperature corrosion. INCONEL 693 alloy is a new type of alloy produced, which provides a previous nickel based alloys can not achieve the high temperature corrosion resistance. In particular, the ability of the alloy to resist metal dust. INCONEL693 alloy provides the best chemical resistance of all the alloys in the existing production of chemical and petrochemical environment in the capacity of the metal dust

**INCONEL 693 Chemical Requirements:**

| Grade       | chemical composition(%) |       |           |         |         |           |
|-------------|-------------------------|-------|-----------|---------|---------|-----------|
|             | C                       | Si    | Cr        | Ni      | Fe      | Ti        |
| INCONEL 693 | <=0.01                  | <=0.5 | 27.0-31.0 | 58-63   | 2.5-6.0 | <=1       |
|             | Mn                      | Cu    | Al        | Nb      | S       | Ni        |
|             | <=1                     | <=0.5 | 2.5-4.0   | 0.5-2.5 | <=0.01  | allowance |

INCONEL 693 alloys offer the ability to produce all the alloys in the best chemical and petrochemical environment, with excellent mechanical properties, creep and fracture properties.

We can provide you with INCONEL 693 alloy products, the INCONEL 693 alloy products due to his unique characteristics and used more widely, deeply welcome the broad masses of customers at home and abroad, so far, we have been exported to India, Vietnam, Pakistan, Poland, Peru in various countries and regions, in the industry enjoyed a high reputation become numerous customer steel suppliers directly. Our company has the strength to provide you with high quality and low price products. In addition, the company is located in Shanghai, the international financial center, close to the Shanghai port, can quickly for the customer delivery, so that customers receive the necessary goods as soon as possible. And we have a first-class after-sales service team, so that every customer has no worries about the purchase of products.
